

TRILLCYBER

# CAPABILITIES

TRUE METHODS. REAL RESULTS. TRILLCYBER.

JACOB HILL

Offensive Security Practitioner

Lawrence, Kansas

CompTIA Security+

## Focused security work, documented for action.

Focused offensive security testing and practical automation for small, clearly scoped engagements. Work is documented with reproducible evidence, technical impact, and remediation guidance.

### EVIDENCE-BACKED OFFERINGS

#### 01 / WEB

### Targeted web application testing

Manual and tool-assisted validation of common web risks, with reproduction steps, impact, and remediation guidance.

[WEB ASSESSMENT ->](#)

#### 02 / NETWORK + IDENTITY

### Network and Active Directory assessments

Scoped enumeration and attack-path validation across services, permissions, Kerberos, and identity controls.

[NETWORK ->](#) [AD ->](#)

#### 03 / AI + LLM

### AI / LLM security reviews

Focused testing for prompt injection, insecure output handling, excessive agency, and related control gaps.

[AI ASSESSMENT ->](#)

#### 04 / AUTOMATION

### Reconnaissance and workflow automation

Bash and Python tooling for repeatable enumeration, evidence collection, and reporting workflows.

[VIEW PROJECT ->](#)

## What the work includes

- Written scope and authorization before testing begins.
- Confirmed findings backed by reproducible evidence.
- Prioritized risk with practical remediation guidance.
- A concise report and walkthrough of the results.

## Assessment focus

### DOMAINS

Web and API / Network / Active Directory and Kerberos / Azure and Entra ID / AI and LLM / Containers / Automation

### REPRESENTATIVE TOOLING

Nmap, Burp Suite, BloodHound, Impacket, Wireshark, RoadRecon, Bash, Python, PowerShell, and Terraform.

### ENGAGEMENT BOUNDARY

Best suited to focused assessments and validation work. Testing is never performed without explicit written authorization.

## Discuss a scoped project
